

# Confidently procure, deploy, and improve best-fit MT

## Take control of your MT

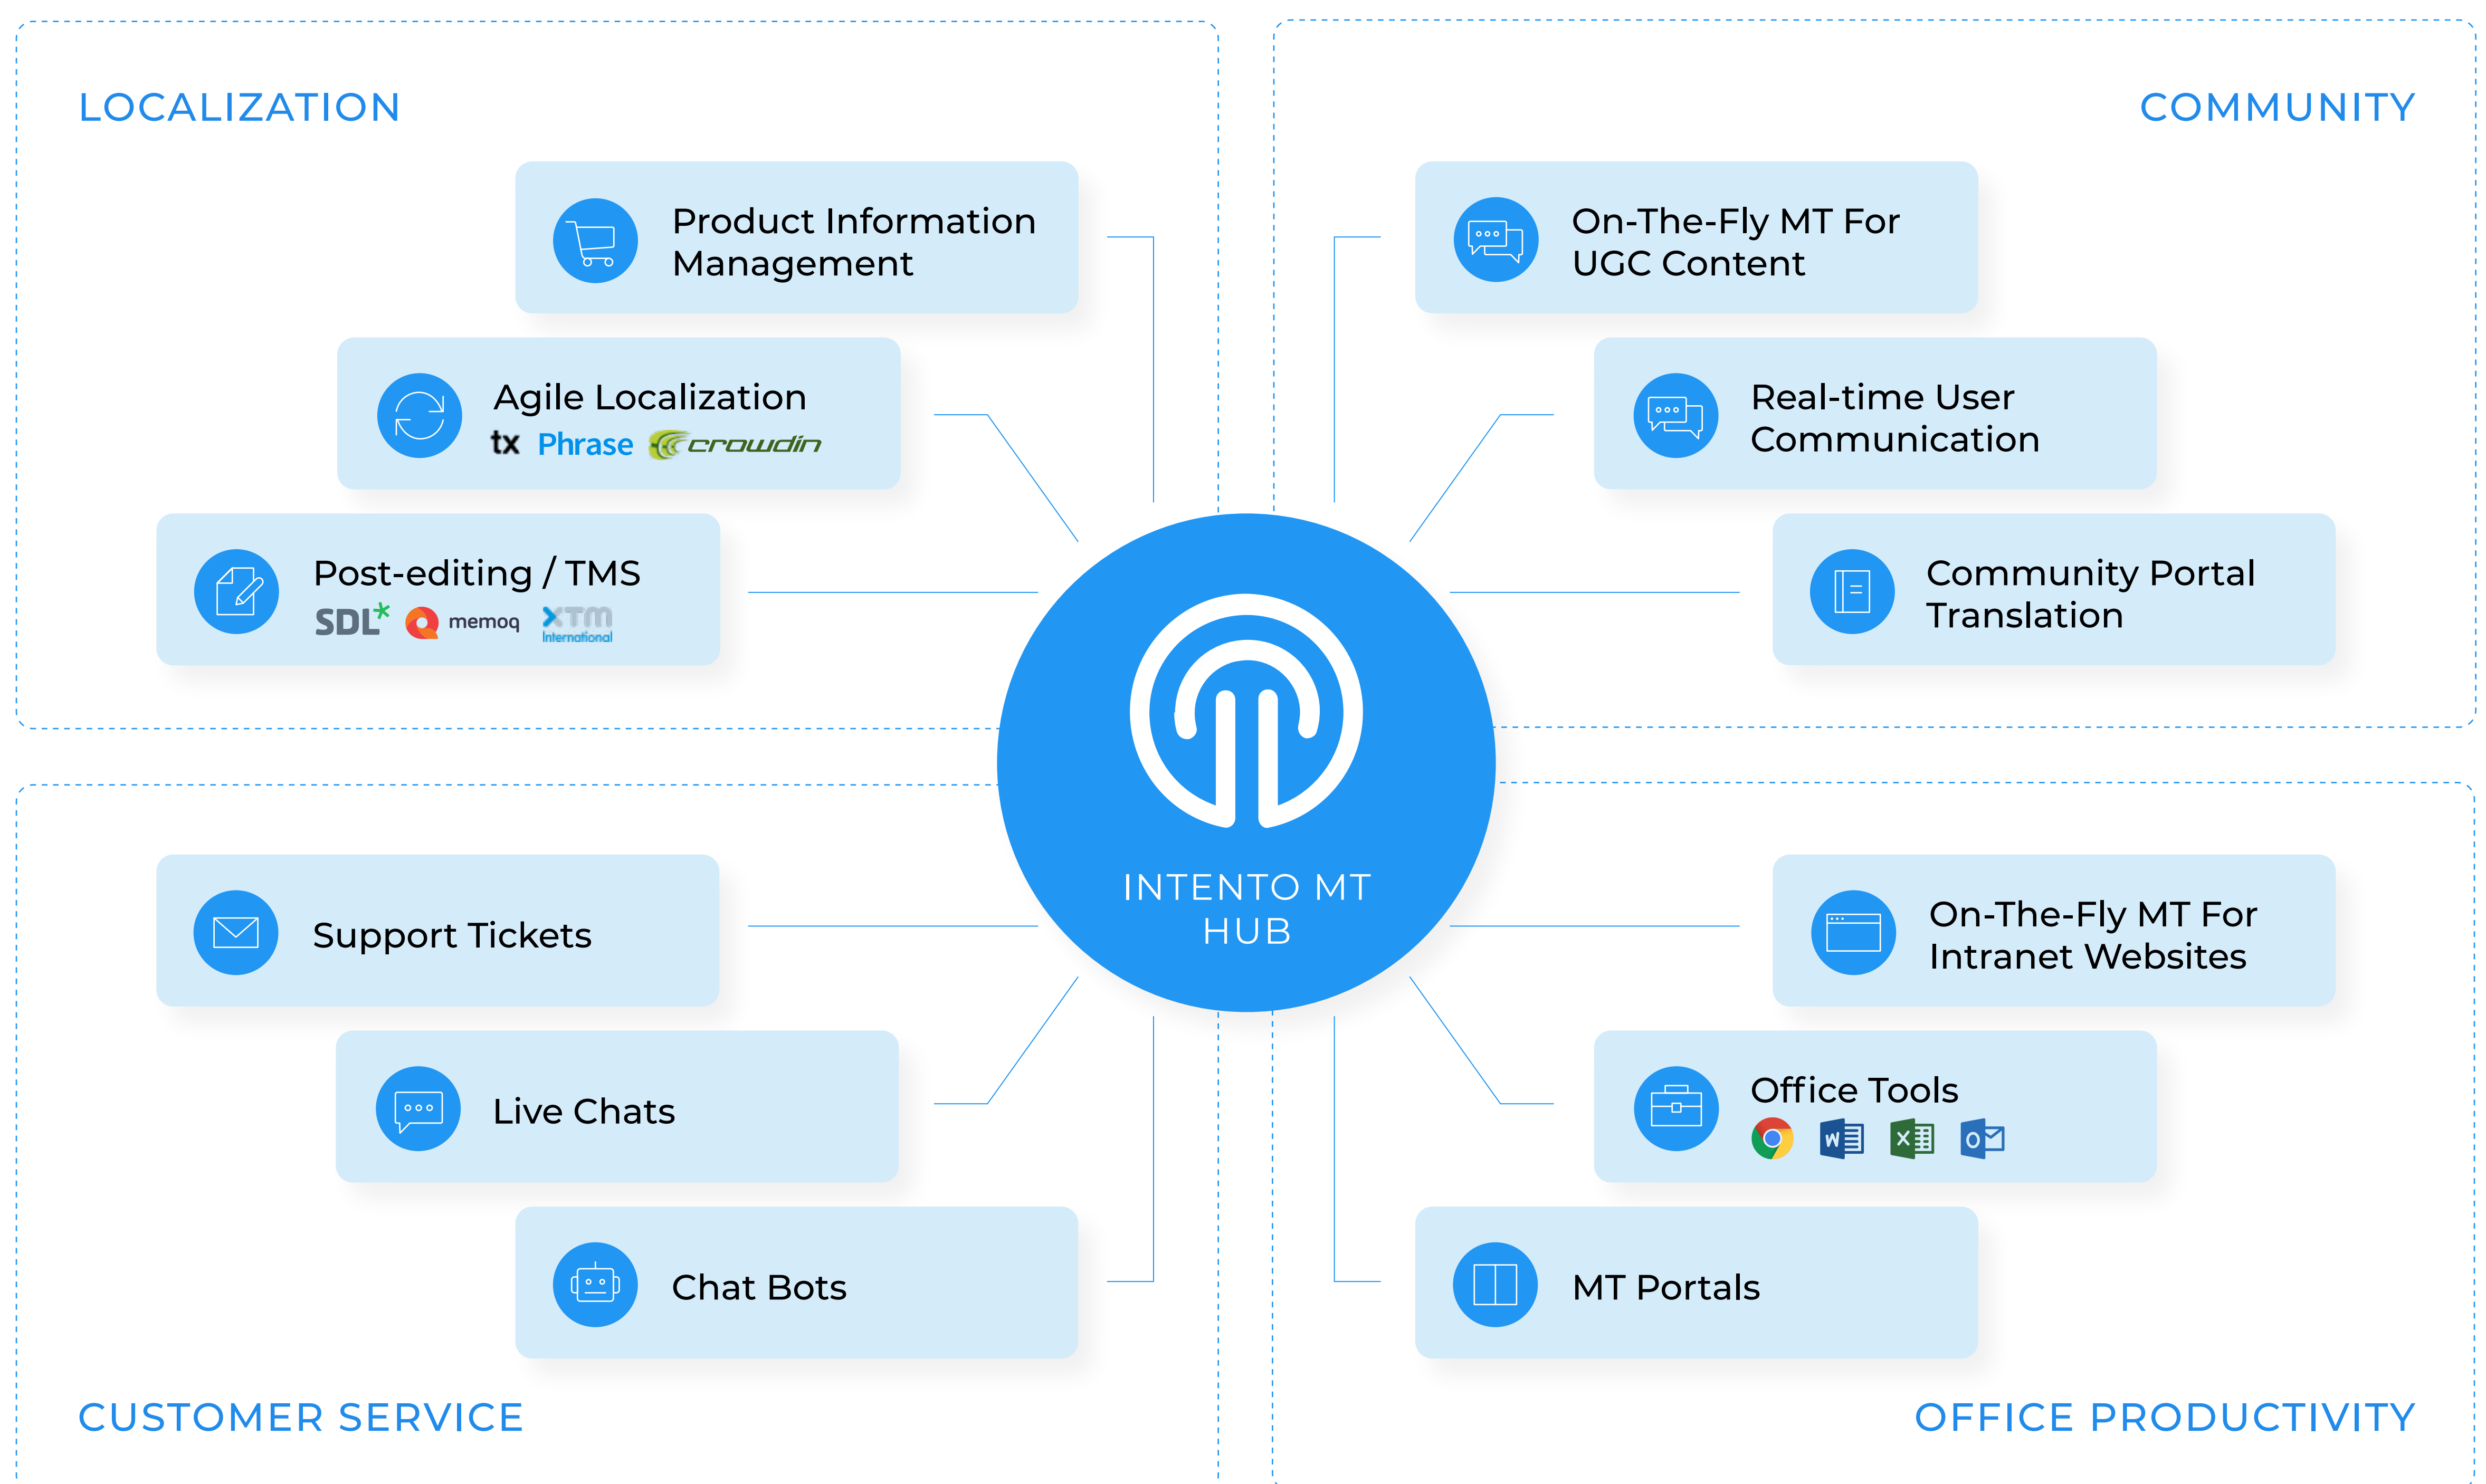

Do you feel like you aren't being given the full story of what MT is capable of? Controlling your own MT allows you to maximize and retain full MT benefit. Our clients see up to 60% of translations accepted by linguists and up to 97% by end-users.

## Up to 20X ROI

The translation industry has been slow at embracing the true value of curated MT – not altogether surprising when you consider that it can drive up to 20X ROI for the customer.

## TMS, LSP & MT Agnostic

With Intento, you derive the maximum MT value through careful curation and ongoing improvement. Even if you switch tools and providers, the MT advantage will stay with you.

## Post-edit game-changer

Intento MT Hub gives you access to over 30 MT engines through a single API to find the best fit and ensure continuous improvement for your domain, content type and language pairs. Our clients see up to 60% of translations accepted as perfect.

## Global Support

Daunted by the challenge of adding native speaking support resources? Intento enables smart MT supported workflows to allow you to cover more foreign languages with FEWER support resources, all while improving quality scores. No copy & paste, right in your ITSM system, up to 97% satisfying translations.

## Community Love

Nothing conveys how much you value your global community more than enabling real-time communication in all their languages. Intento offers over 16,000 language pairs of community translation.
